

Certificate of seagoing service

The application must be accompanied by a certificate of seagoing service required for a certificate of competency or certificate of proficiency, if it is not yet registered in the register of seamen.

Information to be included in a certificate of seagoing service

The certificate of seagoing service must contain the following information for notification of seagoing service:

- the person's name, and personal identity code or birthdate
- the vessel name, vessel type (e.g. cargo/passenger vessel) and port of registry, distinctive number (call sign/IMO-number/register number/Traficom-id), trading area and technical data (engine power and gross tonnage or length/width if the vessel does not have a measured gross tonnage)
- the person's position on the vessel
- the actual number of working days the person was on board while the vessel in operation.
For example 01/01/2016 - 31/01/2016, 21 days seagoing service days if the person has worked only 21 days during January 2016.
- date and shipowner's signature (if the person is the shipowner, the certificate has to be witnessed by another person)
