

Technical vehicle data for producers of statistical and market information products (TPERAP025)

General provisions

The data in the Technical data extraction offered in the information service contains vehicle identification and technical data. In addition to vehicle identification data, the data does not contain personal data.

The dataset can be used for producing statistics and market information products.

The dataset contains vehicles with first-time registration that belong to vehicle categories M, N, L, O or MA and have not been finally deregistered.

Data deliveries and prices

The dataset will be supplied to a broker service once a month. The broker service is provided by Traficom's system supplier

Traficom will invoice dataset-specific fees in accordance with the price list valid at the time (batch extractions from the register). The broker service provider will invoice the costs arising from the brokerage agreement.

Terms and conditions of use

The service is subject to terms of use. The partner must have a valid agreement and a data access authorisation with Traficom and a brokerage agreement with the broker service provider. Contact Traficom for instructions on matters concerning brokerage agreement.

Further information

When providing the service, you can also use open vehicle data available free of charge. For more information, contact www.traficom.fi

Other statistical and market information datasets:

- Transactions in first-time registration statistics with limited data (TPERAT010c)
- Vehicle stock statistics – dataset (TPERAP002c)
