Vehicle Innovation & Exemptions

Proces to change exemption policies

Experimental Exemption Request

- Receive Request
- Intake
- Proposal
- Customer
- RDW
- Ministry

Validate Value Case (experimental exemption)

- Assumption & Risk Analyses
- Validation & Testplan
- Validation & Testing
- Evaluation
- Go/NoGo
- RDW
- Customer
- Road Authorities & enforcement, other stakeholders
- Third party advisory/experts
- Ministry

Feasibility Study

- Legal check
- Enforcability
- Feasibility Operations (eg IT systems)
- Impact priority & planning
- Go/NoGo
- RDW
- Road Authorities & enforcement, other stakeholders
- Ministry

Change of Policy/Regulation & Implementation

- NL change of regulation/policies
- Plan
- Implement
- RDW
- Road Authorities & enforcement, other stakeholders
- Ministry

RDW perspective on SEC

- › Is SEC safe? (vehicle, infrastructure, wheater conditions, driver, other road users)
- › What is the impact on traffic flow & infrastructure maintenance
- › Is CO2 reduction proved? In relation to regular transport, LZV, E2E transport chain
- › What is the impact on level playing field (transport vehicles) and modal shift

When will it be a succes?

What are your experiences?

Planning Validation of Value Case SEC
