- ✓ Product development
- ✓ Quality & environment

EKERI

DUO2 / A-DOUBLE

24.1.2020

WHY A-DOUBLE?

- Ekeri has been building trailers for a number of years.
- Fully functional side opening.
- Fullfils the Finnish somewhat complicated stability and manouvreability requirements.
- Ekeri has vast experience in building trailers with self-steering axle to Norway.
- ATP certification vs. refrigeration units.
- Etc.

SPECIFICATION

- Based upon a standard 13,6 trailer
- Up to 4,40 height – depending on market
- Self steering axle (axle no 3)
- Drawbar coupling – at 250 mm (suitable for e.g. Sweden)
- Optimized axle configuration for improved stability

FLEXIBILITY

- Can be used in all Europe (depending on total height)
- Can be used as first or second trailer in a combination.
- Can be combined with a number of standard euro-trailers.
- Axle placement updated for 2020 to increase flexibility:
 - For 7650 mm trailer
 - For 8150 mm trailer

EKERI

ECONOMY

- Advantages for end users and builders
- Purchase price – no major investments needed.
- Production and process efficiency – allows for standardisation.
- Second hand value and European second hand market.
