# Making transport *truly paperless.*

How to get Europe-wide, accepted eCMR ,  
supported by eFTI regulation  
(Electronic Freight Transport Information)?

# Corridor as a Service

## Real Time Services for Corridor by eFTI

### Road cargo transport

- Paperless
- Contactless
- Obstacle-free
- Real-time overview

### DTLF suggestions

EU eFTI regulation  
(Electronic Freight  
Transport Information)

### Cargo/shipment and carrier's data

- eCMR or domestic e-waybill
- Status of shipment
- GPS + conditions shipment tracking
- Community license
- CO2 calculation for each trip

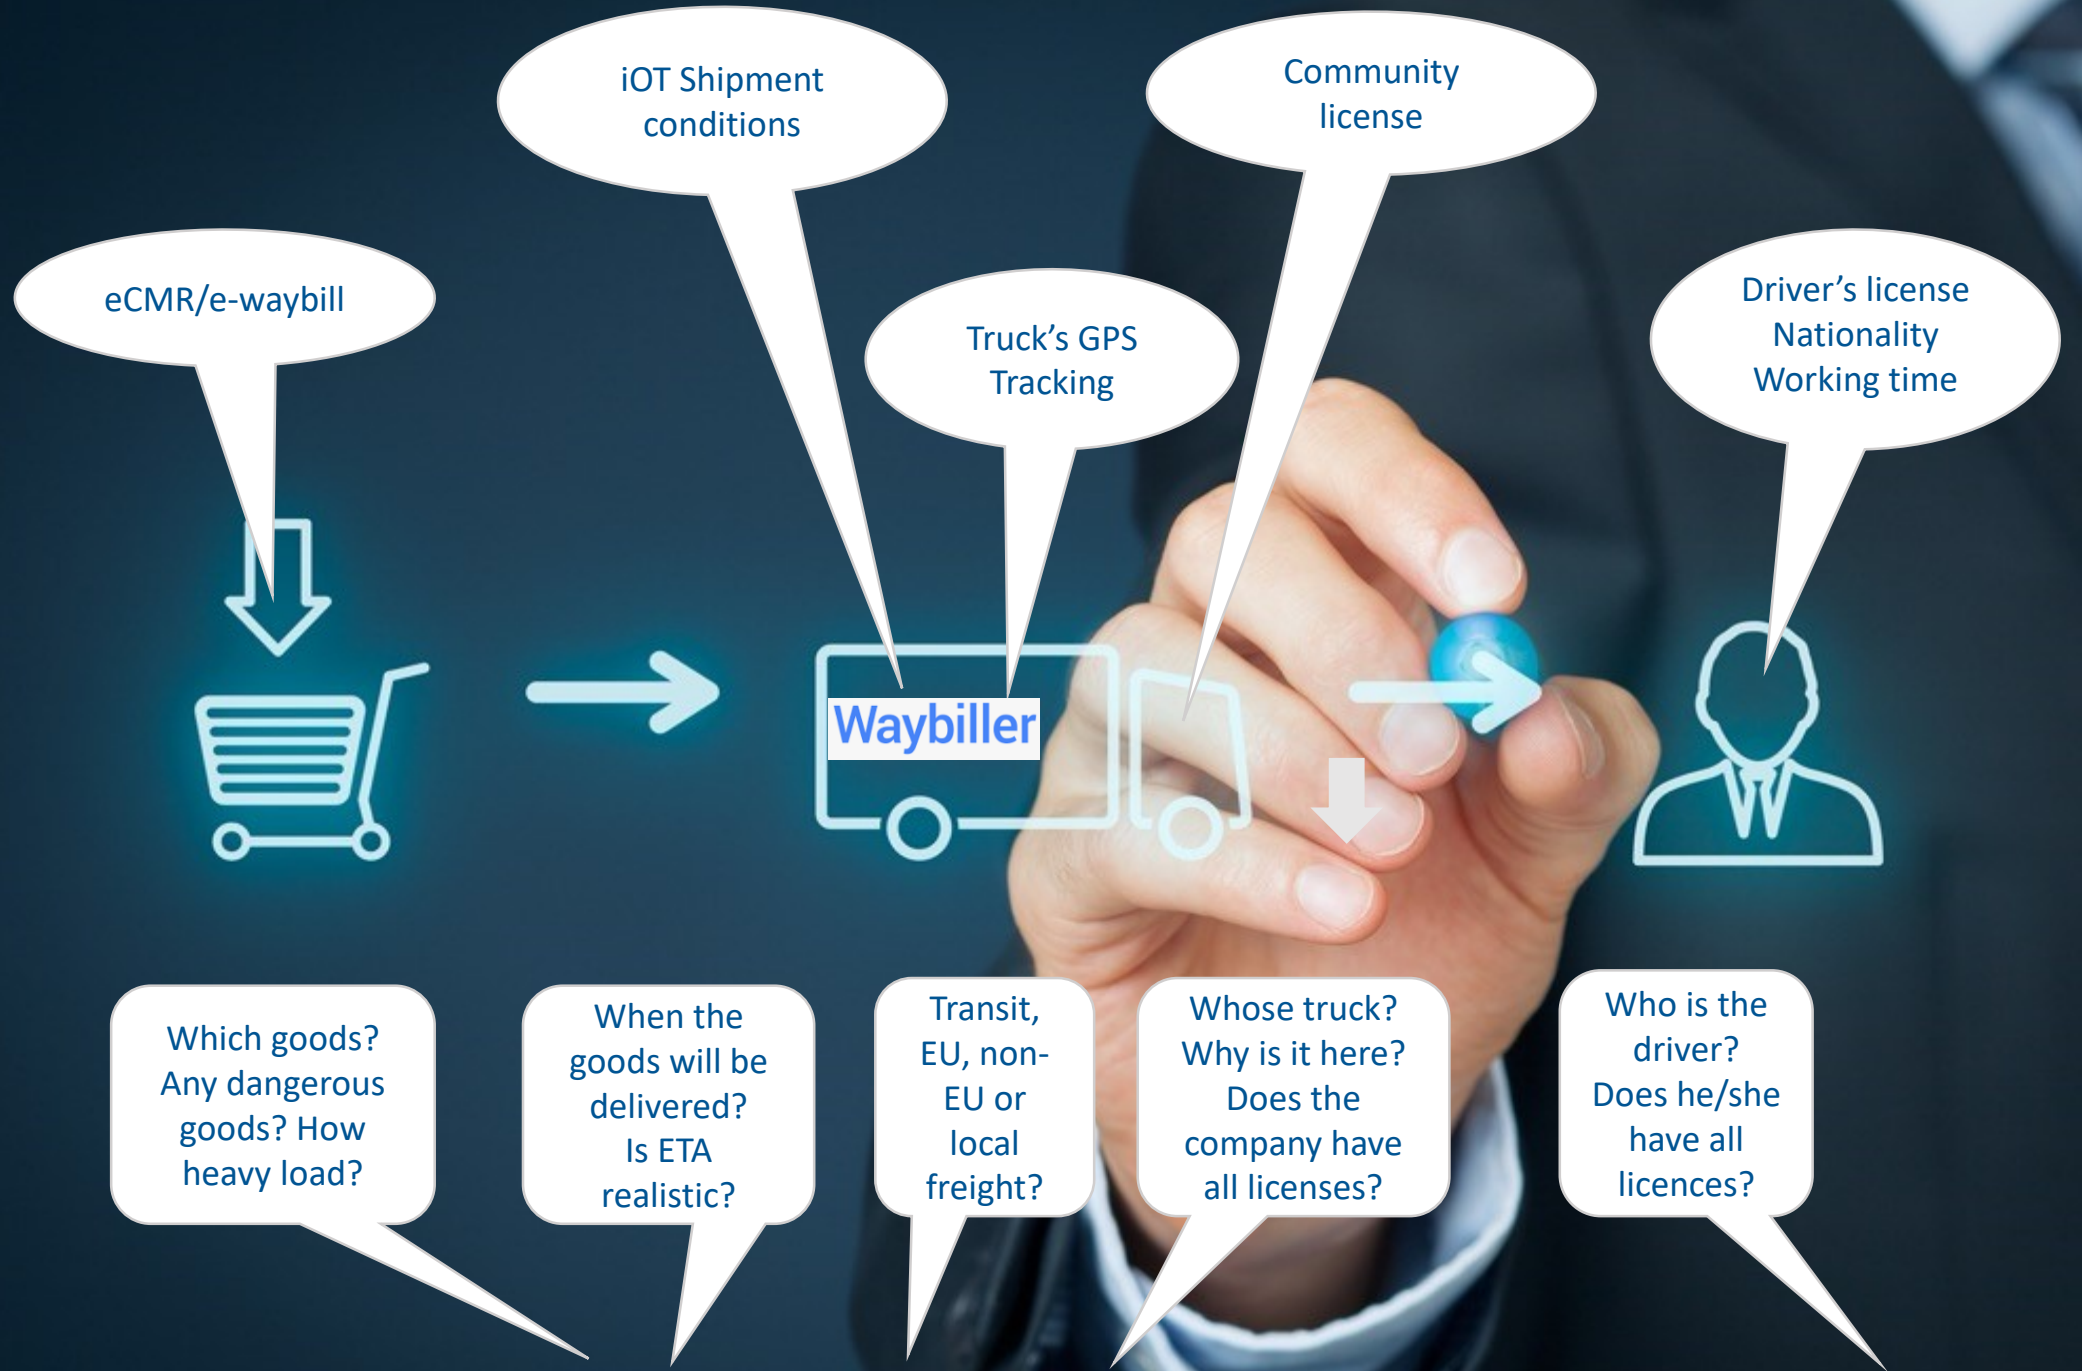

### Driver's personal data (Under GDPR)

- Driver's nationality and permits
- Driver's license
- Driver's worktime

### It means opportunities

- Common Authorised Access to private data
- Collaboration between digital eFTI services
- Certification of eFTI SP's
- CO2 measurement
- Common Data Standard (UNCE/ MMT)
- Common rules for all public authorities (legislation)
- NAP for private and public services (</>)
- GDPR compatible services

# Digital shipment's tracking

## Basic Data set's:

- Driver's data – Name, nationality, license
- Truck's data – National Car registers
- Shipment's data (eCMR & ADR)
- Shipment's conditions (temp, humidity, etc)
- Shipment's status/events (on warehouse/ on road)

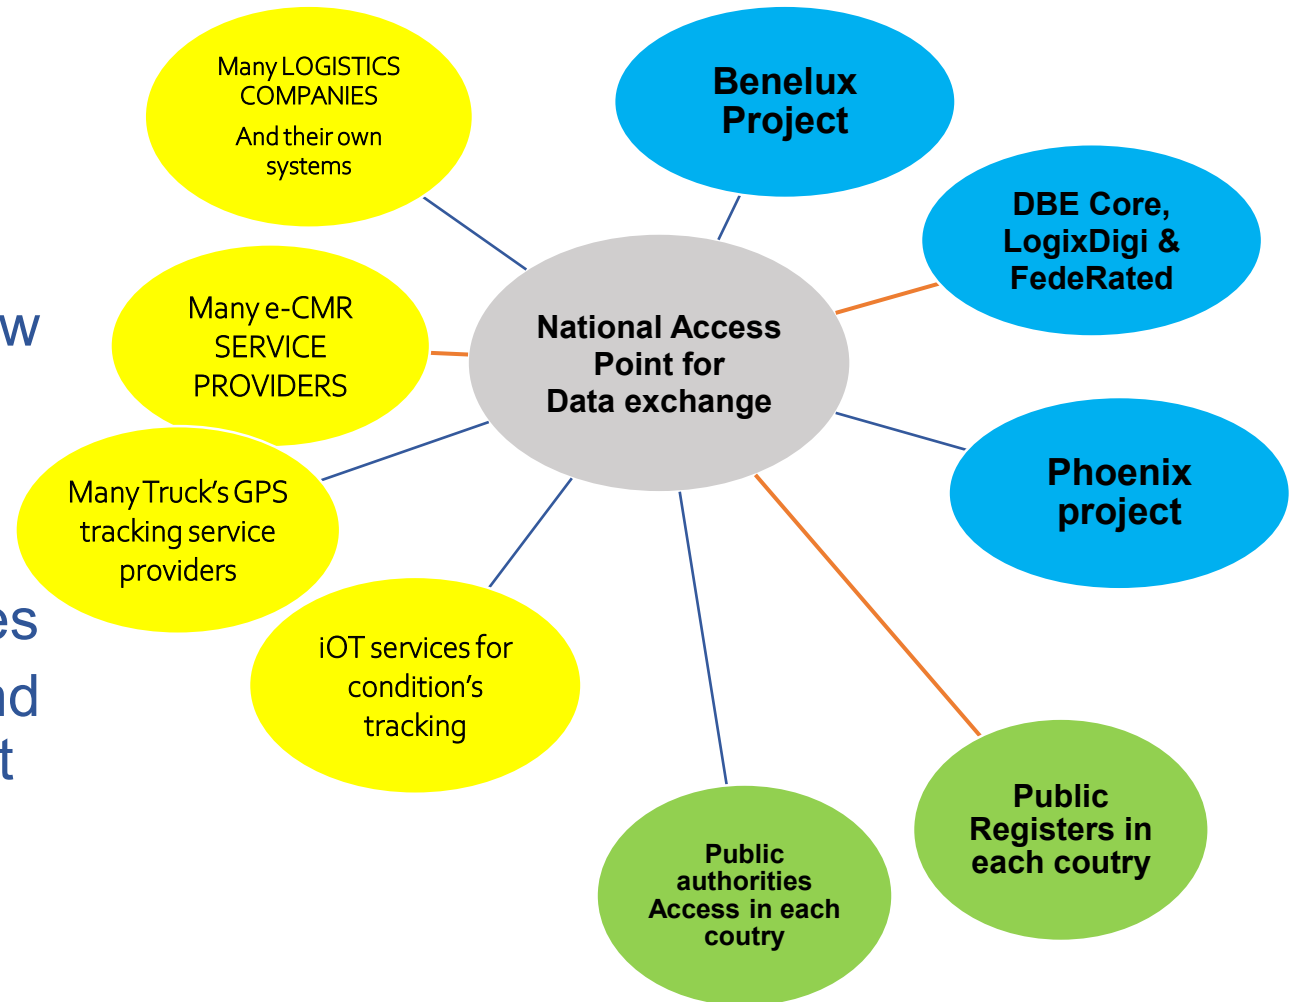

## Preconditions for RT Services in Corridor

- Readyness of truck drivers
- Readyness of public controlling agencies
- NAP's for Public Control and -registers
- Connected public registers
- Collaboration network of private services
- Legislation support

# Why it's so difficult to make Digital Corridor Open market Issues with digital shipment's SP's

- Everyone is talking their own language
- Unstandardized API's and data
- Differences in local legislation
- Competition of digital SP's and low motivation for collaboration
- Unstandardized public registers
- Carrier's motivation to be transparent
- Driver's readiness to use smart devices
- Subcontracting network of shippers and carrier's and sharing information over it

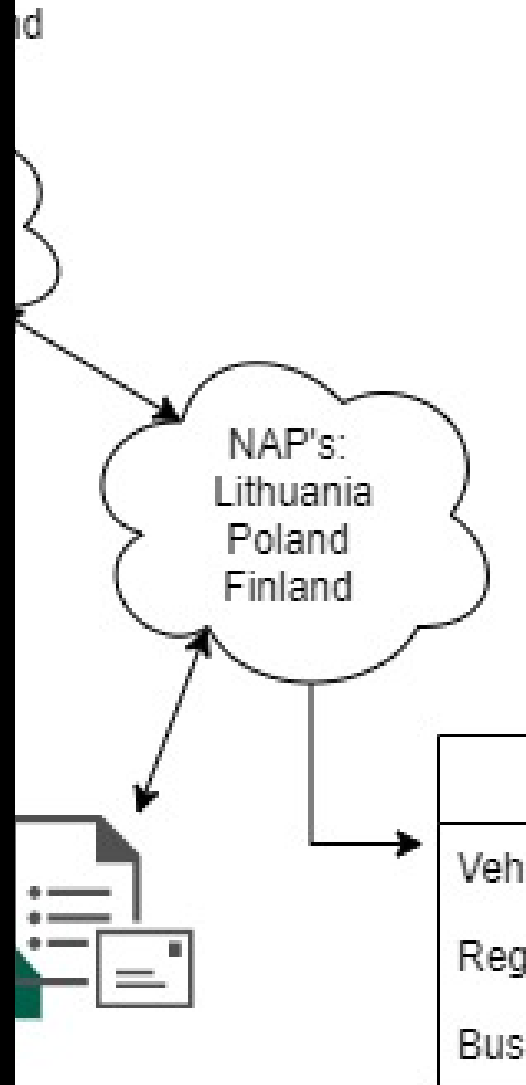

## Practical use-cases for Finland

### - Domestic transport of special type of goods :

- Numerous transports of bulk materials (mining, road construction materials, grain, etc)
  - Forest, woodchips
  - Waste transport
  - Liquid fuel, milk and other tank transport
- 
- Est-Fin regular transport
  - Establish Est-Fin common public-private workgroup for support

Vehicle Register  
Register of Economical Activ  
Business Register

# Green corridor for faster transportation

**1st priority:**  
 Driver's data  
 Truck's data  
 Cargo data (incl ADR)  
 Community license

NAP

**5 min**

Data is linked and no manual work is needed

Confirmation that car check-in has done

- Fast Ferry check-in
- Confirmed boarding
- Automated harbour entrance (SmartPort)
- Harbour taxes
- Fast border control
- Automated roadside check
- Road tolls collection
- Overspeeding tickets
- Overloaded cargo detection
- Illegal cabotage detection
- One to many data exchange

**TALLINK**

**VIKING LINE**

**ECKERÖ LINE**

**DFDS SEAWAYS**

**0,5-1h**

Risk that there is no space in ferry and additional 6h has to be wait

Paperless – Contactless – Real Time

# Making transport truly *paperless*

Connecting Electronic Freight Transport Information (eFTI) platforms to manage all your digital transport documents in one environment
